PLACEMENT TEST for the LIFEPAC CURRICULUM

LANGUAGE ARTS  700-1200

Instructions

This test is designed to aid the teacher in proper placement of the student into the LIFEPAC curriculum. It has two sections: the Student Test and the Answer Key. The Answer Key is an insert in the Student Test and may be removed when testing begins.

This is not a timed test and the student should be given an opportunity to answer each question adequately. If the student becomes bogged down and the test seems too difficult, skip to the next section. If the test is still too difficult, this child’s academic skill level has been reached and testing may stop. Each test level should take no longer than one hour.

Testing should begin approximately two grade levels below the student’s current or just completed grade level. For example, a student entering ninth grade should begin testing at the seventh grade level. (See Below.) This allows for proper grade level placement as well as identification of any learning gaps that the student may have.

The proper placement of a student occurs in two steps. First, there is a diagnosis of skill mastery and second, an establishment of reading level. The student begins by completing the skill mastery part of the test which covers LIFEPACs one through nine. The tenth LIFEPAC is not tested because it simply reviews material covered in the preceding LIFEPACs. When the mastery portion of the test is completed, the student should be given the list of words from the Answer Key that corresponds to the grade level of the mastery test that the student has just completed. As the student reads the list of words aloud, the test administrator should put a check mark on the Student Test after each word that the student mispronounces.

Once the test has been administered, it is ready to be scored. The teacher or parent does all of the scoring except for those who are using one of our placement services. Each section has 10 numbered questions. Each numbered question equals one point. Use the Answer Key to mark all incorrect answers on the Student Test. Next record the total number of correct answers in the box beneath the LIFEPAC number in the left hand column. When all tests have been graded, transfer the number correct by LIFEPAC to the Student Placement Worksheet on AK-12. Then add the total number of points per grade level.

PLACEMENT TEST for the LIFEPAC CURRICULUM

LANGUAGE ARTS  700-1200

Instructions

This test is designed to aid the teacher in proper placement of the student into the LIFEPAC curriculum. It has two sections: the Student Test and the Answer Key. The Answer Key is an insert in the Student Test and may be removed when testing begins.

This is not a timed test and the student should be given an opportunity to answer each question adequately. If the student becomes bogged down and the test seems too difficult, skip to the next section. If the test is still too difficult, this child’s academic skill level has been reached and testing may stop. Each test level should take no longer than one hour.

Testing should begin approximately two grade levels below the student’s current or just completed grade level. For example, a student entering ninth grade should begin testing at the seventh grade level. (See Below.) This allows for proper grade level placement as well as identification of any learning gaps that the student may have.

The proper placement of a student occurs in two steps. First, there is a diagnosis of skill mastery and second, an establishment of reading level. The student begins by completing the skill mastery part of the test which covers LIFEPACs one through nine. The tenth LIFEPAC is not tested because it simply reviews material covered in the preceding LIFEPACs. When the mastery portion of the test is completed, the student should be given the list of words from the Answer Key that corresponds to the grade level of the mastery test that the student has just completed. As the student reads the list of words aloud, the test administrator should put a check mark on the Student Test by each word that the student mispronounces.

Once the test has been administered, it is ready to be scored. The teacher or parent does all of the scoring except for those who are using one of our placement services. Each section has 10 numbered questions. Each numbered question equals one point. Use the Answer Key to mark all incorrect answers on the Student Test. Next record the total number of correct answers in the box beneath the LIFEPAC number in the left hand column. When all tests have been graded, transfer the number correct by LIFEPAC to the Student Placement Worksheet on AK-12. Then add the total number of points per grade level.

GRADE LEVEL PLACEMENT: A student can be placed academically using the rule that he/she has successfully passed the test for any given level if he/she achieves a **Total Score of 70 points or more**.

This student places at grade level ________________.

LEARNING GAPS: Learning gaps can be easily identified with the placement test. If a student receives **points of 6 or less** on any individual test, he/she has not shown mastery of the skills in that particular LIFEPAC. If desired, these LIFEPACs may be ordered and completed before the student begins his assigned grade level curriculum.

Learning gap LIFEPACs for this student are _______ _______ _______ _______

_______ _______ _______ _______

READING LEVEL: Students should be placed at their instructional reading level in Bible, science and history & geography. The purpose of the Read test is to quickly determine this reading level. Although no test is absolute, the Read Test is a good indication of the match between the student’s ability to read and the ability to handle the LIFEPAC curriculum. A score of **6 to 10** on the Read test indicates the student’s instructional level or the level at which the student would be most successful in the LIFEPAC curriculum. Based on the scores from the Read portion of the grade level test, this student would work most independently at the _____ level.

Note: The above placement for reading level is based solely on the Read Test. Other factors that may be considered are the student’s last grade completed and scores on Standardized Achievement Tests. It is not unusual for a student to place at more than one level in various subjects when beginning the LIFEPAC curriculum. For example, a student may be placed at 10th level in Bible, mathematics, science and social studies but 9th level in language arts. The majority of school time should be concentrated on the areas of lower achievement with the ultimate goal of equal skill mastery in all subjects at the same grade level.
