PLACEMENT TEST for the LIFEPAC CURRICULUM MATH 100 – 800

Instructions

This test is designed to aid the parent or teacher in proper placement of the student into the LIFEPAC curriculum. It has two sections: the Student Test and the Answer Key.

This is not a timed test and the student should be given an opportunity to answer each question adequately. If the student becomes bogged down and the test seems too difficult, skip to the next section. If the test is still too difficult, this child's academic skill level has been reached and testing may stop. Each test level should take no longer than one hour. Students should not use a calculator for any of the tests.

Testing should begin approximately two grade levels below the student's current or just completed grade level. For example, a student entering fifth grade [500] should begin testing at the third grade [300] level. (Of course, a second grader could not test below the first grade level [100]). This allows for proper grade level placement as well as identification of any learning gaps that the student may have.

Once the test has been administered, it is ready to be scored. The teacher or parent does all of the scoring. Use the Answer Key to mark all incorrect answers on the Student Test. Next, record the total number of **correct** answers in the score box or on the line at the top of each unit test. **Each numbered question equals one point and always subtract from 10 even on the tests with fewer than 10 questions.** When all tests have been graded, transfer the number correct by LIFEPAC to the Student Placement Worksheet on the back page of the Answer Key. Then add the total number of points per grade level.

Test	Level	Test	Level	Test	Level	Test	Level
101 - 110	Level 1	201 - 210	Level 2	301 - 310	Level 3	401 - 410	Level 4
501 - 510) Level 5	601 - 610	Level 6	701 - 710	Level 7	801 - 810	Level 8

FIRST GRADE TEST ADMINISTRATORS: Test administrators may assist students in reading instructions when necessary; however, care should be taken as too much support may alter test results. First grade students may answer questions on the test pages or the right hand column. The right hand column is available for test administrators to mark whether the response was correct or incorrect. Each question equals one point. There are ten possible points per section. Put all answers on the blanks to the right of the questions unless instructed to do otherwise.
