## Careers in Logistics Planning and Management Services Course Overview

This course discusses careers in Logistics Planning and Management Services, and provides students with the history of logistics and recent advances in the field. The history of logistics creates a foundation of knowledge to build our understanding of the social and economic benefits of modern logistics. Modern societies and economic development depend on the ability to transport products from their point of origin to store shelves and then into the hands of consumers. Current trends in logistics favor low-cost methods, safety, technology, sustainability, and regulations to keep the goods flowing from their source to the consumers.

Packaging goods and materials for safe transport begins with knowing what is being handled. Goods that are intended for consumers have different packaging requirements than materials being shipped to manufacturers. Unitization makes it possible to move goods easily inside warehouse and distribution centers and between modes of transportation. Goods are often shipped through a combination of air, land, rail, and sea modes of transportation. When deciding which mode to use, logistics managers consider the location, transportation plan, routing, convenience, security, and costs related to their mode decision.

Managing inventory involves decision making and analysis to ensure the goods and materials flow through the logistics channels and supply chain properly. Inventory is an asset that the business carries to add revenues and profits. Identifying the need for goods and services is the first step in obtaining goods and services. Within the logistics process, many goods and services are obtained through a process of procurement. Space, time, and money are all important factors to consider when managing existing inventories and the need for future inventories.

Decision makers often look for a balance between the speed and the cost to ship goods. Documentation is needed to identify goods, enable tracking, indicate where the goods are from, and where they are being shipped. Liability for goods is common in all modes of shipping. Risk management identifies, analyzes, and evaluates elements of the business that can go wrong. These liabilities can be outside of the company's control, but many can be prevented. Regulatory agencies create rules and regulations that are intended to protect the public from many risks. Risk management considers the potential for risk—insurance is one way to minimize the risk. Everyone who holds a financial interest in the goods, vehicles, and property wants to know they are protected, so they buy insurance.

Regulatory agencies work in cooperation with other agencies to minimize the risks and liabilities for employers and their employees. OSHA advises employers, their staff, labor unions, and industry leaders on what they can do to keep the workplace safe. They also inspect the workplace to ensure the employers are in compliance with OSHA standards. Logistics offers many career opportunities across seven career pathways. Logistics is a high growth industry, and is a stable career choice. There is something for every career-seeker, ability, and experience level.

The objective of this course is to introduce the student to the field of logistics planning and management and to explain the career opportunities that are available in this field.

### Objectives

- Apply communication skills with students, parents and other groups to enhance learning and a commitment to learning.
- Demonstrate critical thinking skills while processing logistics management perspectives, warehouse and distribution operations, inventory controls, regulations, and safety procedures.
- Categorize risks to safety, health, and the environment in the logistics industry.
- Demonstrate collaboration skills to enhance professional objectives for the company and the customer.
- Describe the rights and responsibilities that apply to individuals and practitioners within the logistics industry.
- Define professional development requirements to maintain employment and to advance in their chosen career.
- Apply organizational skills and logic to enhance their abilities and aptitudes.
- Demonstrate skills that enhance their understanding of safety in the workplace.

Careers in Logistics Planning and Management Services	<b>Unit 1: Providing and Managing Logistics Services for the Company and the Customer</b>	
	<b>Assignments</b>	
	1. Course Overview	9. Project: Goods and Their Origins
	2. The Role of Transportation, Distribution, and Logistics in Society and the Economy	10. The Challenges of Transporting Goods
	3. Project: From Origin to Consumer	11. Making Logistics Easier with Technology
	4. Current Trends in Logistics	12. Project: Process Improvement
	5. You Are the Future of Logistics	13. Quiz 2: Logistics and the Supply Chain
	6. Project: Making Goals	14. Special Project*
	7. Quiz 1: Transportation, Distribution, and Logistics - Then and Now!	15. Test
	8. Logistics Management and the Supply Chain	16. Course Project Part 1: Distribution Facility Project*
		17. Glossary and Credits

Careers in Logistics Planning and Management Services	<b>Unit 2: Logistics and Supply Chain Management</b>	
	<b>Assignments</b>	
	1. Material Handling: Packaging	9. Distribution is the Center of Activity Within
	2. Project: Consumer Goodies	10. Project: Where Did You Get That?
	3. Material Handling: Unitization	11. Pricing
	4. Material Handling: Weights & Measures	12. Quiz 2: Warehousing, Distribution, and Pricing
	5. Project: The Space Shuttle Endeavor	13. Special Project*
	6. Quiz 1: Material Handling	14. Test
	7. Warehousing	15. Course Project Part 2: Innovation*
	8. Project: Kansas City Smart Port	16. Glossary and Credits

Careers in Logistics Planning and Management Services	<b>Unit 3: Inventory and Inventory Management</b>	
	<b>Assignments</b>	
	1. Inventory	9. Managing Procurement and Purchasing
	2. Project: Taking Stock (Part 1)	10. Project: Business Culture
	3. Inventory Management	11. Optimizing Procurement Practices
	4. Project: Taking Stock (Part 2)	12. Quiz 2: Procurement and Purchasing
	5. Inventory Accounting	13. Special Project*
	6. Quiz 1: Inventory Management	14. Test
	7. Procurement and Purchasing	15. Course Project Part 3: Inventory Controls*
	8. Project: Colgate's Procurement Process	16. Glossary and Credits

Careers in Logistics Planning and Management Services	<b>Unit 4: Transportation Management</b>	
	<b>Assignments</b>	
	1. Modes of Transportation	9. Regulating Risk
	2. Project: Mode to Go	10. Project: Emergency Response
	3. Documentation	11. Insuring Risk
	4. Project: Importing & Exporting	12. Quiz 2: Risk Management
	5. Liability	13. Special Project*
	6. Quiz 1: Transportation, Documentation, and Liability	14. Test
	7. Managing Transportation Risk	15. Course Project Part 4: Modes of Transportation*
		16. Glossary and Credits

Unit 5: Logistics Safety & Opportunity	
Careers in Logistics Planning and Management Services	<b>Assignments</b>
	1. OSHA Rights & Responsibilities
	2. Project: OSHA's Forms
	3. Safety First
	4. Project: Hazardous Materials
	5. Working & Safety
	6. Quiz 1: Safety First
	7. Career Goals
8. Project: Personality Traits	
9. Available Careers	
10. Project: Creating A Resume	
11. Career Credentials	
12. Quiz 2: You Are The Future Of Logistics!	
13. Special Project*	
14. Test	
15. Course Project Part 5: Preparation & Prevention*	
16. Glossary And Credits	

Unit 6: Course Project, Review, and Exam	
CLPMS	<b>Assignments</b>
	1. Course Project Part 6: Preparing Your Proposal*
	2. Review
	3. Exam

(\*) Indicates alternative assignment
