

Why blended learning with Ignitia is right for students, teachers, and parents.

“**Blended learning**” is an educational experience that combines traditional face-to-face instruction with supplemental online learning. This model allows students to learn subjects at the ideal pace, while giving educators the opportunity for more individualized instruction.

- Blending improves student engagement and independent learning habits.
- All Ignitia courses integrate easily into the blended learning environment.
- Ignitia’s course customization and exclusive teacher authoring tool provide even more flexibility and individualization for each school’s blended learning program.
- Students and educators can access Ignitia anytime, anywhere for personal flexibility.
- The teacher dashboard provides visibility into each student’s progress, allowing for individualized support.
- Online automated reporting allows students and parents to monitor and discuss progress and achievements.
