

Get students back on track with Ignitia's curriculum prescription mode.

Ignitia's curriculum prescription mode is the fast and efficient way to help students who need to repeat courses or make up missing credits.

How It Works

- Each unit includes pre-tests to assess preliminary mastery of the content.
- Ignitia administers auto-assigned test questions based on lessons taken.
- In "flex" mode, Ignitia automatically skips the content students already know and prescribes only the materials needed to achieve mastery.

Benefits

- Students and teachers can track progress at-a-glance.
- Students can work at their ideal pace and gain a sense of accomplishment upon completion.
- Students can quickly catch up and graduate with their class.

Our training, service, and technical support teams have the expertise and tools to help you streamline the prescription process.
