

Create custom courses that embrace your school's vision with the teacher authoring tool.

Ignitia's teacher authoring tool makes it easy to blend content from existing courses or create something completely new that suits the needs and vision of your Christian school.

- Use your knowledge and imagination to create custom lessons, projects, quizzes, and tests, or build an entire course from scratch.
- Adjust the order of units and lessons within a course to match your school's scope and sequence or individual learner needs.
- Incorporate passages, articles, and text, videos and animations, games and activities, or web 2.0 tools to spark interest in course content among your students.
- Choose suitable question formats for your quizzes and tests, including true/false, multiple choice, multiple select, fill in the blank, matching, and essay.
- Optimize the quantity of response options to quiz and test questions.
- Flex assessments automatically adjust quiz and test material to match the content included in your custom course, ensuring that all exams reflect the subject matter in your lessons.
