## Lesson Book

The **Lesson Book** is a valuable teacher tool. You can use it to view and grade schoolwork as well as keep track of student progress. You can also edit subjects in the curriculum or change the status of assignments. If you have students working within time frameworks you set, the **Lesson Book** offers a specially-designed calendar for managing their schoolwork and activities.

On your **Home Page**, click the **Lesson Book** button. The default **Lesson Book** screen opens, where you see three tabs at the top:

**Home**—Takes you back to your **Home Page**

**Lesson Plan**—Gives you access student schoolwork and activities through an easy-to-use calendar.

**Assignments**—Lets you see a teacher list of things-to-do, view student assignments and grades, and enter into assignments.

## Assignments Screen

Let's look at the **Assignments** screen first since it is the one that appears when you open your **Lesson Book**.

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

The screenshot shows the 'SOS Teacher - [Lesson Book]' window. It has a navigation bar with 'Home', 'Lesson Plan', and 'Assignments' tabs. Below the navigation bar is a 'Student' dropdown menu set to '[Active Students]'. There are two buttons: 'Grading Tasks (8)' and 'Skipped Problems (2)'. The main area contains a table of assignments:

Student	Subject	Unit	Assignment Title	Type
Dennis	High School Health (2013)	BODY ESSENTIALS	The Head and Crown of Creation	Lesson
Dennis	Alaska State History (2013)	ALASKA STATE HISTORY	Introduction to Alaska	Project
Emma	Science 500 (2013)	CELLS	The Basic Unit of Living Things: A Cell	Lesson
Carter	New Testament Survey (2013)	INTRODUCTION TO THE N	Various Empires and Periods	Lesson
Carter	Vietnam Era (2013)	THE ORIGINS OF U.S. INV	French Indochina	Lesson
Dennis	College Planner (2013)	MY EDUCATIONAL FUTUR	What's God's Will for My Educational Future?	Lesson
Carter	Vietnam Era (2013)	THE ORIGINS OF U.S. INV	The Geneva Accords	Lesson
Carter	Vietnam Era (2013)	THE ORIGINS OF U.S. INV	Test	Test

Below the table is a 'Student Schoolwork' section with a table that is currently empty. The table has columns for 'Subject', 'Term' (set to '2013-2014'), 'Assignment Title', 'Type', and 'Score'. At the bottom, there are buttons for 'Edit Subject', 'Unit Details', 'Unit Functions', 'Assignment Details', and 'Assignment Functions'.

### Student List

Use the drop-down menu to select the name of a student and display associated assignment information.

### Teacher To-Do List

The top part of the screen displays either a list of your grading tasks or a list of problems your students skipped. Think of this area as your teacher to-do list. It gives you links to click to open an assignment. Completing a task automatically removes it from your to-do list. If you choose not to do a task, clicking the checkbox next to it removes it from the list.

#### Grading Tasks

Click this tab to see a list of your teacher grading tasks. This button displays the total number of grading tasks you have. When selected, it appears darker in color than the **Skipped Problems** button next to it. Double-click any assignment to open it to the first problem needing to be graded.

#### Skipped Problems

Click this tab to see a list of problems your students have skipped. This button always displays the total number of skipped problems in your list. When selected, it appears darker in color than the **Grading Tasks** button next to it. Double-click any assignment to open to the skipped problem.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Sorting Student Assignments

You can sort any of the assignment information in the top window according to student, subject, unit, assignment or type, helping you to organize and view the items. To do this:

1. Click the name of the column heading you'd like to sort by.
2. Each time you click, the information is alphabetically or numerically sorted in ascending or descending order.

**Tip:** Can't read the name of a unit or assignment because it's too long? Adjust the columns to make them wider. In the bar with the column headings, put your cursor just to the left of a column heading. When you see the cursor change in appearance, click and hold your left mouse button down, dragging the cursor to the left or right. Make your columns wider or narrower any time you need to adjust so you can see.

**Hint:** When you put your cursor between any sections on the screen, it changes appearance. This means you can click and drag your cursor in different directions, making the windows bigger or smaller, enabling you to see more or less information.

#### Student Schoolwork

This is all the schoolwork you assigned to a student in a school term. You are able to see grades for subjects, units, and assignments that the student has already completed as well as view schoolwork yet to come.

**NOTE:** If a student was assigned schoolwork in more than one school term, use the term drop-down menu (found directly beneath the **Student Schoolwork** bar) to select another term and see all the schoolwork for that term displayed on the screen.

#### Subjects

See a list of all the subjects you assigned to a student. If the student has completed any work in a subject, the grade earned for that subject is also displayed.

#### Units

View all the units assigned within a subject. If the units aren't displayed, click the subject name, and they appear below the subject in the order assigned. They appear in a smaller font than subject titles, enabling you to quickly and easily see the difference between subjects and units. If a student has completed work in a unit, the grade for that unit shows up here. When you no longer want units displayed, click the subject name and the units disappear.

#### Assignments

If you click any unit name on the left side of the screen, all the assignments for that unit appear on the right side of the screen. At the same time, the unit name is highlighted on the left, showing that you're looking at the assignments for that particular unit. To view an assignment, click any assignment title.

#### Assignment Types

You can see the types of assignments you assigned. These can be lessons, quizzes, tests, or projects.

#### Assignment Scores

Use the grades you see on the screen to help you keep track of how a student is progressing.

#### Edit Subject

This button opens a window that allows you to edit assigned subjects. Use **Edit** to add, delete, or rearrange units and assignments. **Edit** also allows you to remove subjects for particular students.

#### Unit Details / Assignment Details

This button opens a window that allows you to view and print detailed information about a unit or an assignment depending on which of the two **Details** buttons you select. **Unit Details**, on the left side of the screen provides information on a unit. **Assignment Details**, on the right side of the screen provides details of a selected assignment.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Unit Functions / Assignment Functions

Click the function button to display a menu of function options to perform for the selected unit or assignment. You can also right-click your mouse to display this same menu. The functions differ somewhat, if you clicked the **Unit Functions** or **Assignment Functions** button.

Unit functions include:

- **Edit the Subject** - equivalent to the Edit Subject button.
- **Block** or **Unblock the Unit** - allows you to block or unblock all quizzes and/or tests in the selected unit.
- **View the Unit Details** - equivalent to the Unit Details button.
- **Set the Unit Grade to Zero** - permits you to set the grade for the entire unit to zero, permitting the student to continue to the next unit in the subject.

Assignment functions include:

- **Open** - lets you open the assignment
- **Block Assignment** - lets you block or unblock an assignment (acts as a toggle).  
When an assignment is blocked, you see  next to it.
- **Change Due Date** - makes it easy to change the due date for the selected assignment.
- **Clear and Reassign** - clears any work student has already done in the assignment, erasing all answers and grades. Student must then redo the assignment.
- **Clear Highlighting** - permits you to remove any highlighting in the assignment.
- **Print Assignment** - lets you print the assignment (or any part of it) without opening it.
- **Remove Assignment** - lets you remove (delete) the assignment for the student, so the student does not have to do it, nor is it included in the unit or course score.
- **Set Assignment Grade to Zero** - enables you to assign a grade of zero to the assignment, permitting the student to continue to the next assignment in the subject.
- **View Assignment Details** - equivalent to the **Assignment Details** button.

#### Lesson Plan Screen

Now, let's take a look at your **Lesson Plan** screen. This tab lets you view student schoolwork in calendar form. If you've assigned work to a student in a school term structured around due dates, use the **Lesson Plan** screen to keep track of his information. This screen takes all the same assignment information from the **Student Schoolwork** section of the **Assignments** screen and places it into an easy-to-use calendar.

**NOTE:** If you assigned work to a student in a school term not driven by due dates, that information does not show up on the **Lesson Plan calendar** screen. Keep track of this student's schoolwork in the **Student Schoolwork** section of the **Assignments** screen instead.

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

### Lesson Plan

Takes you to the **Lesson Plan** calendar screen.

### Assignments

Takes you to the **Lesson Book** screen where you see all the schoolwork in list form.

### Select Student

Use this drop-down menu to select the name of a student and display assignment information on this screen.

Choose **[Active Students]** to display assignment information for all your students who have work in school terms driven by due dates.

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

### Select Term

Use this drop-down menu to select any student's school term and display the assignments in it.

Choose **[Student's Current]** to display assignment information for a student's most current school term.

The area on the left side of the screen shows you multiple consecutive months of a student's school term. Days in white are school days, and days in gray are non-school days. Days in red indicate events you have added to the calendar. Click to see previous months or to see future months. You can also click and hold your cursor over the name of any month to see a small menu that helps you quickly skip to another month. To edit information for a specific day, double-click the date, and a small edit window appears.

Click any date in the multi-month-view calendar section or the one-week-view calendar section to select it. The selected date appears highlighted, in both calendar views.

Click anywhere along the bar between the one-month and five-month view calendars to expand your one-week-view calendar so that it takes up the entire screen. When the calendar has been expanded, click the bar again to bring back the five-month-view calendar.

The range of dates for the week displayed in the one-week-view calendar is displayed above it. Click the left arrow to display previous weeks or the right arrow to display future weeks.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

The calendar allows you to view any week of a student's school term. Days in yellow are school days, days in gray are non-school days, and days in red indicate events have been added to the calendar for this day. If you are viewing schoolwork for one student, you see a list of all the assignments a student is expected to do on the dates you assigned them. If you are viewing schoolwork for multiple students, you see a list of students with a number next to each student's name that indicates how many assignments he/she has on any given day. Double-click on the date to edit information for a specific day or see a list of a student's assignments. A small edit window appears.

**Note:** To view an assignment, click any black-colored assignment title on this screen to open that assignment.

Notice the icons (small pictures) next to each assignment title in the **Lesson Plan**.

- means this is a lesson

- tells you this assignment is a project or experiment

- lets you know the student has a quiz

- alerts you to a test the student has scheduled

When you view the **Lesson Plan** for an individual student, you notice the score the student achieved on completed lessons. Any assignment titles in **red** indicate a grading task for you. All projects show the final due date in parentheses after the project title.

#### Reschedule

Sets new start or end dates for any subject in a student's curriculum. Click the **Reschedule** button. A small window opens. Place a checkmark beside any subjects for which you want to set new dates. Click any start or end date for a subject to manually type in a new date or make a tiny drop-down calendar appear. Use the left and right arrows in the mini-calendar to find the month you want; then click a date to select it. If you click the **Reschedule** button in this small window, all the new dates you set are applied. They appear in schoolwork lists and on the **Lesson Plan** calendar screen.

#### Today

Returns you to today's date on both the five-month-view calendar and the one-week-view calendar.

#### Print

Prints out a list of assignments due on different days. A small window appears. Choose the start and end dates for the range of days to print. Click the **Preview** button to see what your printed page will look like.

### Opening an Assignment

Since you have two views of your student's assignments, from the **Assignment** screen and from the **Lesson Plan** screen, you can open an assignment from either screen. You see the same screen either way. You are able to view the presentation part of the assignment as well as any work a student has done on the problems. Grades for completed problems are displayed as well. While an assignment is open, you can also grade a problem or use the **Assignment** or **Problem Notepad**.

To open from an **Assignment** screen:

1. On your **Home Page**, click **Assignments** in the **Lesson Book** widget.
2. Select a student's name from the **Select Student** drop-down menu.
3. In the **Student Schoolwork** section, click a subject name to display the units.
4. Click a unit name to display the assignments in that unit.
5. Click any assignment title to go to that assignment.

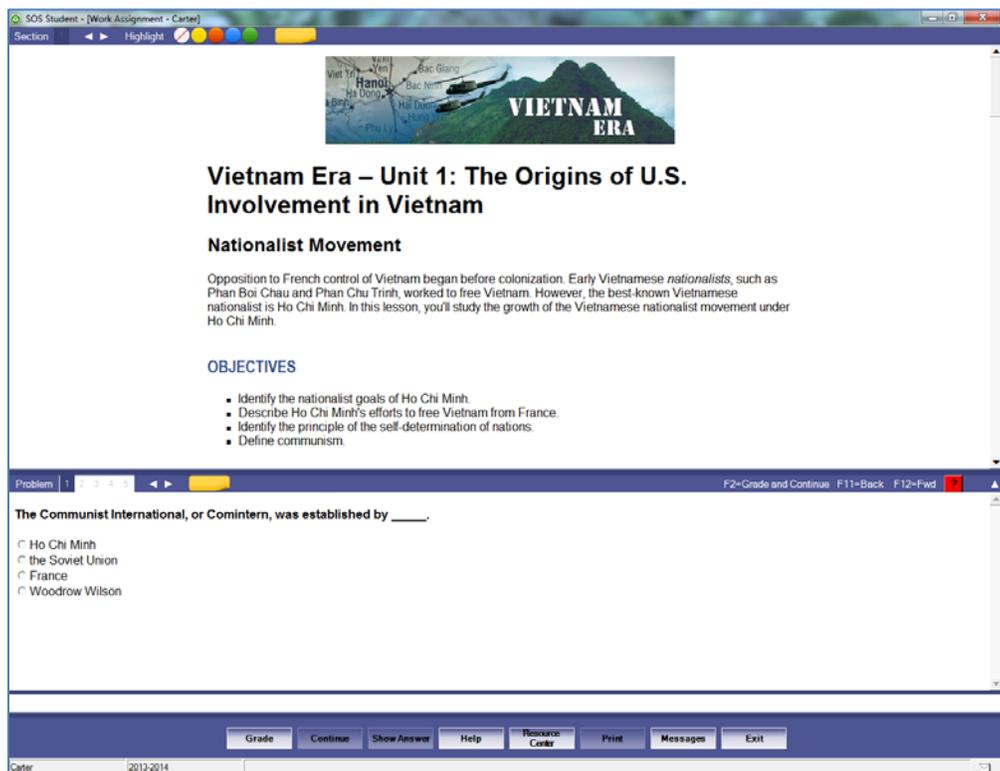

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

To open from a **Lesson Plan** screen:

1. On your **Home Page**, click **Lesson Plan** in the **Lesson Book** widget.
2. Select a student's name from the **Select Student** drop-down menu.
3. Select a term from the **Term** drop-down menu.
4. Double-click the assignment you want to open.

The **Assignment** screen you see looks very much like the assignment screen your students see when they are working in assignments. Several buttons and features are specialized, allowing you to perform any number of teacher tasks within the assignment. If there are specific teacher notes associated with the lesson, they usually appear at the top of the lesson. Also, you may find "Teacher Only" help associated with some questions in the **Problem** section of assignments.

Student **Assignment** screens are usually made up of two major parts:

**Presentation sections**—present most of the instructional material students see in their assignments

**Problems area**—display problems and answers to already-completed problems

### Presentation sections

Sometimes, when there's a lot of information to cover, it's easier for students to see new information if it's broken up into smaller, bite-sized pieces. This area tells you how many sections there are to an assignment presentation. Click any section number to see the information in that section. The

highlighted section number lets you know which section you are viewing. Click  to view either the previous or the next presentation sections.

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

To the right of the section number are a series of colored circles. These are highlighters. Use the highlighters to mark up text in an assignment. To highlight text, select the text with your mouse and click the color you want to use. Text stays highlighted even after you exit and return to the assignment.

If you want to remove the highlighting from the text, click . This does NOT completely remove the highlighting, it only makes it disappear from the lesson. To completely remove the highlighting, the teacher must do this from either the **Lesson Plan** screen or the **Assignments** screen. See page 17 for instructions.

**NOTE:** When you open a student assignment from SOS Teacher, you are able to see text exactly as your students highlighted it in SOS Student.

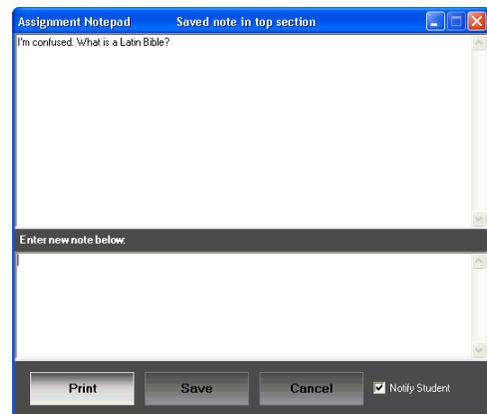

### Assignment Notepad

Here's a handy notepad you and your students can use to jot down thoughts. Students can ask questions or make comments about anything they encounter in the presentation part of an assignment. Similarly, you can answer their questions or include comments of your own. To use the assignment notepad, click it and a small **Assignment Notepad** window pops up. Read your students' notes or type in your own where you see the cursor blinking. The **Notify Student** box is already checked by SOS. If you do not want to send the message to the student, click the checkbox to remove it, otherwise a message is sent notifying your students to read your response. Hit **Save** to save your note, **Cancel** to cancel it, or **Print** to print it. Back on the assignment screen,

your assignment notepad looks like this  if there's a note in it. Click the notepad anytime to open it and type more, read a student's comments, or delete text.

Notes previously sent from this assignment, either by the student or the teacher are saved, in sequence in the top section of the notepad.

The presentation section of an assignment displays the instructional information a student learns in an assignment. It contains text, pictures, videos, games, Internet links, and more.

### Problem Section

Every presentation section in an assignment includes problems that assess students' understanding of what they've been learning. In this area you also see how many total problems an assignment has and will see them displayed in batches of 10. Click any problem number to highlight it and display the problem below. You may also click **F12** to advance through the problems.

Click  to view either the previous or the next problem.

**NOTE:** Notice that, as you click through problems, the presentation section that introduced the information for them always displays at the top. Refer to it at any time to see where students drew their answers from.

The  on the far right side of the bar with the problems can be clicked to open a description of each specific problem type. After you display a problem, click it for a description and instructions.

Problem numbers appear in different colors on the problems toolbar:

- **gray**—problems not yet completed
- **green**—problems students have answered correctly
- **red**—problems students have either answered incorrectly or only received partial credit for
- **blue with a line through it**—problems you decided to allow your students to skip
- **black**—problems you must manually-grade

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Problem Notepad

This problem notepad works just like the assignment notepad above. Use it to respond to students' questions or comments about problems. To open it, click it and a small **Problem Notepad** window pops up. Read, compose, print, or delete notes in this window, the **Notify Student** box is already checked. Click the checkbox if you do not want the student to receive a message to view your changes. Click **Save** to save your note. Click this notepad at any time to open it again.

The bottom window displays the problems for an assignment, as well as student answers to any of these problems.

Place your cursor between the presentation and problems sections and notice that the cursor changes in appearance. This means you can click and drag your cursor up or down, changing your window sizes, enabling you to see more or less information.

Click the "up" arrow on the right side of the screen to make your problem section fill the whole screen. It changes into a "down" arrow you can then click to make your problems section small again.

Status area—Find out how students scored on different problems by clicking a problem number and looking here. You are able to see a percentage score, the total number of points earned, and the number of attempts it took to correctly answer the problem.

Click any of the boxes in the lower left-hand corner to manually type in the score you want a student to receive on a problem (or change the score for an already-graded problem). You are able to type in the number of points, the percentage, or the letter grade. Click the **Save** button when you're done.

**NOTE:** When you type in one of these boxes, the other two automatically adjust.

#### Show Answer

Displays the correct answer for any problem. Clicking **Enter** also displays an answer key window.

#### Skip

Allows your student to skip a specific problem in an assignment and not have that problem considered part of the assignment grade. Select any problem number and click this button. The number turns gray and is crossed-out. Once a problem is skipped, the **Skip** button changes into an **Assign** button, so you can click it if you want to reassign the problem.

#### Reassign

Select any problem number; click this button to erase the grade, allowing the student to rework the problem. The problem number is changed to gray in color, meaning that it was reassigned. Your student sees the assignment in his/her to-do list and knows it is not complete until the assigned problems in it are all worked. When you click this button, you have the option to also clear the student's current answers or not.

#### Next

Advances you to the next problem.

#### Save

Saves any changes you make to the assignment.

#### Resource Center

Lets you access the tools in the Resource Center while in the assignment.

#### Messages

Lets you send messages to or receive messages from your students.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Print

Prints an assignment. A small pop-up window appears, letting you decide how you want the assignment to display—with presentations, problems, graphics, grades, student answers, or any combination of these. Before printing, you have the option to click a **Preview** button to view what your selections will look like on the printed page.

Depending on the type of assignment you are viewing, the information in the presentation and problems sections may slightly vary:

- Quizzes and tests don't usually display much text in the presentation sections because they are testing students for previously-learned information. Most of the content is found in the problems section instead.
- Projects are dynamic and can consist of reading/writing activities, hands-on experiments, library research, interviews, artwork, or anything else you decide to assign. Because of this, the presentation sections may display instructions and background information students need to complete them. They may offer text, graphics, videos, or web links. The problems sections may display more instructions or provide links for students that open up writing space.

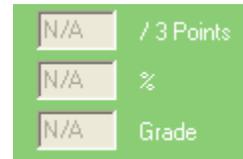

#### Exit

Lets you exit the assignment and return to the previous screen.

#### Grading an Assignment

Most assignments are automatically graded by SOS. Some assignments require you to manually grade problems such as those requiring students to write paragraph responses to problems. Your lesson book offers an easy teacher to-do list, so you can see all grading tasks you have at any given time.

1. On your **Home Page**, click **Lesson Book** in the **Administration** widget. Your **Lesson Book** opens.
2. Make sure the **Assignments** tab is selected. Click the **Grading Tasks** button (in the upper left-hand corner) for one or all of your students in order to view a list of assignments or problems you must grade.
3. Click any completed assignment title to open that assignment.
4. Once you're in the assignment, SOS automatically takes you to the first problem to be graded. Click **Next** to move to the next problem to grade.
5. Grade the problems and record the scores (by point value, percentage or letter grade) in the grade boxes at the lower left-hand corner of the assignment screen.
6. Click the **Save** button to save your changes. Your changes are automatically applied.
7. Click the **Exit** button to return to the previous screen. Notice that the grading task is removed from your task list.

#### Grading Shortcut Keys

There are several functions keys (Fx) available for you to use while grading student work.

**F2** - allows you to save the grade and advance to the next problem to be graded.

**F4** - lets you save the grade you just entered and exit the assignment

**F11** - enables you to return to the previous problem

**F12** - advances you to the next problem

#### Viewing an Answer Key

1. On your **Home Page** click **Lesson Book- Assignments** in the **Administration** widget. Your **Lesson Book** opens.
2. Click any assignment title to open that assignment.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

**NOTE:** If you don't see the assignment you're looking for, check to make sure the student's name (from the **Select Student** drop-down menu) and the term (from the term drop-down menu) are correct. Click a subject name, a unit name, and then the assignment title in the **Student Schoolwork** section to display all the schoolwork you assigned that student in the given term.

3. Once you're in the correct assignment, find the problem you want to see.
4. Click the **Show Answer** button. A small window appears, displaying the correct answer for that problem. All answers to this problem that the computer considers correct are displayed. You, as the teacher, always have the option to mark an answer correct. Repeat this process to see answer keys for any problem.

#### Assigning, Reassigning, or Skipping a Problem

If you want to assign a skipped problem or ask a student to completely rework a problem:

1. On your **Home Page** click **Lesson Book- Assignments** in the **Administration** widget. Your **Lesson Book** opens.
2. Choose the correct student from the **Select Student** drop-down menu. Make sure the correct term is selected also (under **Student Schoolwork**).
3. Select the correct subject and unit under **Student Schoolwork**. Double-click the assignment containing the problem you want to assign/reassign.
4. Once you are in the correct assignment, find the problem you want to assign/reassign.
5. If the problem is currently a skipped problem, click the **Assign** button to assign it. If you want the student to rework the problem, click the **Rework** button to reassign it. In either case, the problem appears gray in color, meaning the problem is now (re)assigned. The assignment will reappear in the student's to-do list.

#### To Completely Skip a Problem

If there is a problem that you want a student to skip completely without being returned to the assignment:

1. On your **Home Page** click **Lesson Book- Assignments** in the **Administration** widget. Your **Lesson Book** opens.
2. Choose the correct student from the **Select Student** drop-down menu. Make sure the correct term is selected also (under **Student Schoolwork**).
3. Select the correct subject and unit under **Student Schoolwork**. Double-click the assignment containing the problem you want to assign/reassign.
4. Once you are in the correct assignment, find the problem you want to assign/reassign.
5. Click the **Skip** button. The problem is removed from the student's work.

#### Viewing Problems Students Have Skipped

1. On your **Home Page** click **Lesson Book- Assignments** in the **Administration** widget. Your **Lesson Book** opens.
2. Click the **Skipped Problems** button (in the upper left-hand corner) to view a list of problems that have been skipped.
3. Click any black-colored assignment title to open that assignment.
4. Once you're in the assignment, the program takes you directly to the skipped problem.
5. Decide if you want to allow the student to skip the problem or if you want to reassign it. If you decide to reassign it, click either the **Assign** button or the **Rework** button. (The **Rework** button clears the problem score and reassigns the problem.) It appears in the student's to-do list to be completed.
6. When you finish viewing all of an assignment's skipped problems, click the **Exit** button to return to your lesson book.

**Notice** that the skipped problems are off your to-do list.

### Clearing Student Work on an Assignment

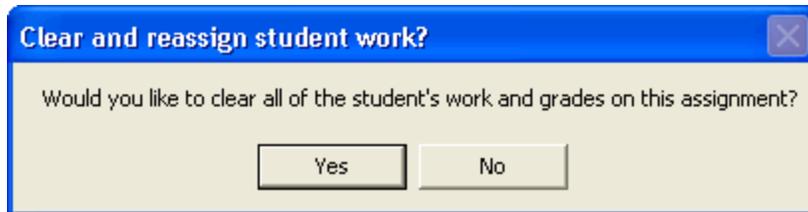

#### Clearing Student Work from the Assignments Screen

1. On your **Home Page** click **Lesson Book- Assignments** in the **Administration** widget. Your **Lesson Book** opens.
2. In the **Select Student** drop-down menu, select the student. If the student currently has subjects in more than one school term, you may need to also use the term drop-down menu (directly beneath the words "Student Schoolwork") to select the term that contains the assignment for which you want to clear work. The student's assignment information appears in the bottom half of the screen.
3. Click a subject in the **Student Schoolwork** section. After you do this, all the units for that subject display.
4. Click a unit in the **Student Schoolwork** section. After you do this, all the assignments for that unit display.
5. Single-click the assignment to highlight it.
6. Click **Clear and Reassign** to clear all the work a student has done for that assignment. If the assignment has any highlighted text, you first see a prompt asking if you want to clear the highlighting. Click **Yes** to clear the highlighting, or **No** to leave it.

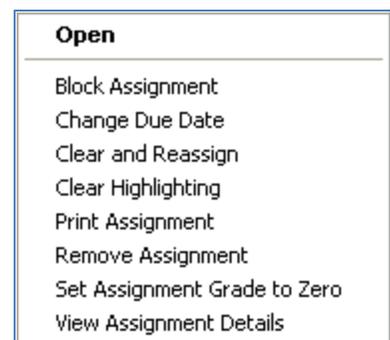

**NOTE:** If the lesson has no highlighting, you do not see this prompt.

7. A second prompt then asks you if you would like to clear the student's work and grades for the assignment. Click **Yes**. The changes are immediately applied, and it is as if the student never did any work in the assignment.

**NOTE:** Alternately, you can also right-click the row of the assignment you want to clear and select **Clear and Reassign** from the menu that appears (see at right) to remove all the work the student has done and reassign it. You can also use this menu to just clear any highlighted text from an assignment.

#### Clearing Student Work from the Lesson Plan Screen

1. On your **Home Page** click **Lesson Plan** in the **Administration** widget. Your **Lesson Plan** opens.
2. In the **Select Student** drop-down menu, select the name of the student.
3. In the **Select Term** drop-down menu, select the term that contains the assignment where you want to clear work.
4. On any of the calendars, double-click the day of the week that contains the assignment for which you want to clear work. A small **Day Detail** window opens.
5. Single-click the assignment to highlight it.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

6. Click **Clear and Reassign** to clear all the work a student has done for that assignment. If the assignment has any highlighted text, you first see a prompt asking if you want to clear the highlighting. Click **Yes** to clear the highlighting, or **No** to leave it. (see examples of prompts on previous page.)

**NOTE:** If the lesson has no highlighting, you do not see this prompt.

7. A second prompt then asks you if you would like to clear the student's work and grades for the assignment. Click **Yes**. The changes are immediately applied, and it is as if the student never did any work in the assignment.

#### Clear Highlighted Text

To clear highlighting from a lesson without clearing the lesson, you can either select the **Clear Highlighting** option when you right-click as described in the **Note** at the bottom of the previous page, or you can follow **Steps 1-7** for clearing student work from the **Assignments** screen, and then select **No** on the prompt to clear and reassign the assignment.

#### Blocking and Unblocking an Assignment

SOS gives you the ability to block assignments, preventing students from working on them before you think they are ready. You also need to be able to unblock assignments as well.

#### Blocking And Unblocking And Assignment From The Assignments Screen

1. On your **Home Page** click **Lesson Book- Assignments** in the **Administration** widget. Your **Lesson Book** opens. You can block and unblock assignments from either of your **Lesson Book** screens.
2. In the **Select Student** drop-down menu, select the name of a student. If the student currently has subjects in more than one school term, you may need to select the term that contains the assignment you want to block. Use the term drop-down menu (directly beneath the words "Student Schoolwork") to do this. The student's assignment information appears in the bottom half of the screen.
3. Click a subject in the **Student Schoolwork** section. All the units for that subject are displayed.
4. Click a unit in the **Student Schoolwork** section. All the assignments for that unit are displayed.
5. Click the **Assignment Functions** button to display the menu.
6. Click the **Block Assignment** option. This acts as a toggle. If the assignment was not blocked before, a small graphic () appears, indicating that the assignment is blocked and the student is not able to open it. If the assignment was blocked before you clicked this option, the icon disappears and the assignment is available to the student to work.

#### Open

- Block Assignment
- Change Due Date
- Clear and Reassign
- Clear Highlighting
- Print Assignment
- Remove Assignment
- Set Assignment Grade to Zero
- View Assignment Details

#### Blocking And Unblocking An Assignment From The Lesson Plan Screen

1. On your **Home Page** click **Lesson Plan** in the **Administration** widget. Your **Lesson Plan** opens.
2. In the **Select Student** drop-down menu, select the name of a student.
3. In the **Select Term** drop-down menu, select the term that contains the assignment you want to block.
4. On any of the calendars you see, double-click the day of the week that contains the assignment you want to block. A small **Day Detail** window opens.
5. Click the assignment you want to block.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

6. Click the **Block** button to block that assignment. The icon () appears, indicating the assignment is blocked.
7. To unblock an assignment, select the blocked assignment and click the **Block** button again. The  icon disappears. The assignment is now unblocked and a student is able to open it.

**NOTE:** Alternately, from the **Assignments** screen, you can also right-click the row of the assignment you want to block and select **Block Assignment** from the menu that appears. If the assignment is currently blocked, simply click **Block Assignment** and it acts as a toggle to remove the block on the assignment.

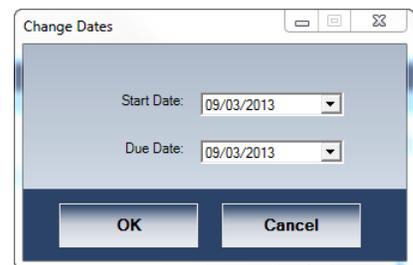

### Change Assignment Due Dates

SOS gives you the ability to change the due date for an individual assignment. You can do this from either of the Lesson Book screens.

#### Change Assignment Due Dates from the Assignment Screen

To change the due date of the selected assignment:

1. On your **Home Page** click **Lesson Book- Assignments** in the **Administration** widget. Your **Lesson Book** opens.
2. In the **Select Student** drop-down menu, select the name of a student. If the student currently has subjects in more than one school term, you may need to select the term that contains the assignment you want to block. Use the term drop-down menu (directly beneath the words "Student Schoolwork") to do this. The student's assignment information appears in the bottom half of the screen.
3. Click the subject in the **Student Schoolwork** section. All the units for that subject are displayed.
4. Click the unit containing the assignment in the **Student Schoolwork** section. All the assignments for that unit are displayed.
5. Click the **Assignment Functions** button to display the menu.
6. Click the **Change Due Date** option.
7. When the **Change Dates** window opens, select the **Start** and **Due Dates** you want the assignment to have.
8. Click the **OK** button. The due date for this assignment is immediately changed.

#### Changing an Assignment's Due Dates from the Lesson Plan Screen

1. On your **Home Page**, click **Lesson Plan**. This opens your **Lesson Plan** screen, a screen to view student assignments in calendar form.
2. In the **Select Student** drop-down menu, select the name of the student.
3. In the **Select Term** drop-down menu, select the term that contains the assignment you want.
4. On any of the calendars you see, double-click the date that contains the assignment you want. A small **Day Detail** window opens. (See example on page 20 below.)
5. Single-click an assignment to highlight it.
6. Click the **Change Due Date** button to change the due date of that assignment. A small **Change Dates** window appears.
7. Either manually type in a new start and end date for the assignment or use the tiny drop-down calendars to select the dates you want.
8. Click the **OK** button to confirm your changes. Your changes are automatically applied.

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

### Zero a Unit or an Assignment

If there is an assignment that you want to mark complete with a grade of zero:

1. On your **Home Page** click **Lesson Book- Assignments** in the **Administration** widget. Your **Lesson Book** opens. You can zero out either a single assignment or an entire unit.
2. In the **Select Student** drop-down menu, select the student. If the student currently has subjects in more than one school term, you may need to also use the term drop-down menu (directly beneath the words "Student Schoolwork") to select the term that contains the assignment for which you want to zero work. The student's unit and assignment information appears in the bottom half of the screen.
3. Click a subject in the **Student Schoolwork** section. After you do this, all the units for that subject display.
4. Click a unit in the **Student Schoolwork** section. After you do this, all the assignments for that unit display.

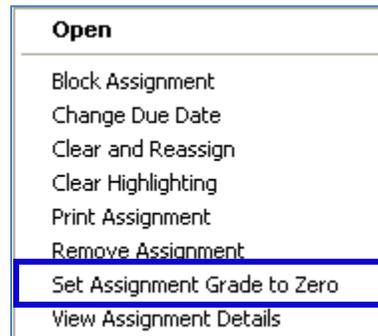

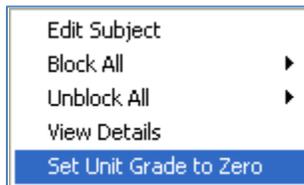

If you are zeroing out an entire unit:

5. Click the **Unit Functions** button.
6. Click the **Zero Unit** option on the **Unit Functions** menu and go to **Step 7** below.

If you are zeroing out a single assignment,

5. Click the assignment to highlight it and click the **Assignment Functions** button.
6. Click the **Zero Assignment** option on the **Assignment Functions** menu and go to **Step 7** below.

**NOTE** Alternately, you can also right-click the row of the unit or assignment you want to block and select the appropriate **Set Grade to Zero** option from the menu that appears.

7. Click **Yes** on the **Are you sure?** window to completely erase all student work and give the unit or assignment a grade of zero.

### Unit or Assignment Details

The **Unit Details** report is accessed from the bottom of the **Assignments** page. It shows you the following information:

- ~ Subject, unit, and assignment titles
- ~ Access information
- ~ Length of time spent on the unit
- ~ Assignment type, due date, and score
- ~ Date student completed the assignment
- ~ Date assignment was last graded

To print this report, click **Print** and use your computer's normal print function.

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

The **Assignment Details** report is accessible from the bottom of the **Assignment** page. It provides you with the following information about an assignment:

- ~ Subject, unit, and lesson title
- ~ Lesson type, due date, and grade
- ~ Access information
- ~ Amount of time spent on the assignment and on vocabulary and games
- ~ Problem details

You see the number of times the student played games and the points earned playing the games. A student earns 5 points for each successful completion of Spelling Bee and Vocabulary. For the rest of the vocabulary games (the ones in the Arcade and Flash Cards), one point is earned for each word.

Arcade Games are all vocabulary and spelling practice games. These include, Pick a Pail for grades 3-5, Moon Match for grades 6-12, Vocabulary, Spelling Bee, Full Speed, Word Hike, and Balancing Act. These last three all have a different appearance for grades 3-5 and grades 6-12. All of the games, except Spelling Bee, require at least 4 vocabulary words to play.

To view a problem, position your cursor over the problem. When the problem information turns blue, click and the assignment window opens to the problems.

To print this report, click **Print** and use your computer's normal print function.

### Editing a Day's Assignments

1. On your **Home Page**, click **Lesson Plan**. This opens your **Lesson Plan** screen, a screen to view student assignments in calendar form.
2. In the **Select Student** drop-down menu, select the name of a student.

**NOTE:** If you do not select a student, and choose **Active Students** instead, you see a list of all the students who have school terms with due dates. You are able to view student assignments for any day that you click, but you are not able to edit them.

3. In the **Select Term** drop-down menu, select the school term that contains the assignments you want to edit.
4. Double-click any date in either the multi-month-view calendar or the one-week-view calendar to open a small window listing the day's assignments. The **Day Detail** window lets you edit the day's schoolwork.
5. Use any of the buttons and features on the **Day Detail** window to make changes to the student's day. The changes are automatically applied in the student calendar.

Day Detail

Tuesday, March 25, 2014

Subject	Unit	Assignment Title	Type	Grade

Move Up

Move Down

Block Clear and Reassign Add Remove Change Due Dates Print

The top of the window tells you the day selected. Click the left or right arrows on either side to view previous or future days.

The area in the middle gives you information about all of a student's assignments, including grades the student has received on already-completed assignments. Click any assignment title to open that assignment.

### Move Up and Move Down

When you have assignments from the same subjects that start on the same dates, you can rearrange their order, deciding which you want a student to do first. Single-click to select one of these assignments. The **Move Up** and **Move Down** buttons are now enabled, so you can click them to move the selected assignment up or down in the list.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Block

Blocks an assignment, preventing a student from working on it until you unblock it. Block a quiz, for example, making sure a student has done enough review before taking the quiz. When an assignment is blocked, you see  next to it.

**NOTE:** This button also unblocks assignments. If you globally blocked all quizzes or tests, see Global Blocking and Unblocking for assistance.

#### Clear

Clears the work a student has done in an assignment, erasing all the answers and all the grades. The student must do the assignment again as if it had never been done.

#### Add

Adds extra assignments to the day. When you click this, a small **Add Assignment(s) to Day** window opens. The student's existing subjects appear on the left (in the **Student's Subjects** area), and the assignments you can choose from appear on the right (in the **Available Curriculum** area). Drag any assignment from the right side of the window into a unit in the left-side of the window. Click the **OK** button, and any assignments you added to the day automatically appear in the existing list of schoolwork.

#### Remove an Assignment

Removes an assignment from the day. Click an assignment to select it. Click the **Remove** button. All the work and grades are removed with the assignment.

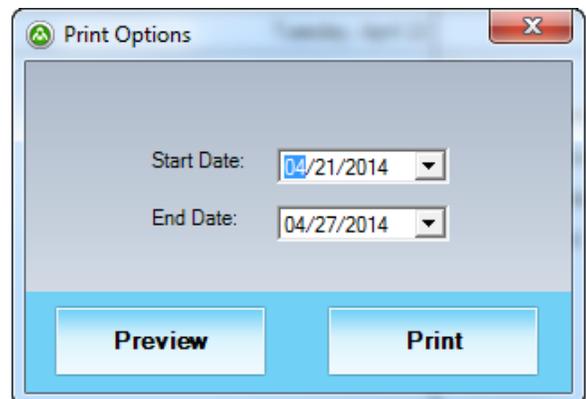

#### Change Due Date

Changes the start or end date for any assignment in the day. Manually type in a new date or use the tiny calendars to select the date you want. (See specific steps in **Change Assignment Due Dates** on page 17 above.)

**NOTE:** Remember, you can also remove an assignment or change the due date of an assignment by clicking the **Assignment Functions** button on the **Lesson Book - Assignments** page. Next, selecting the **Remove** or **Change Due Date** option. You then see a small window open where you confirm the removal of the assignment or select new start and end dates.

#### Printing a List of Student Assignments

1. On your **Home Page**, click **Lesson Plan**. This opens your **Lesson Plan** screen, a screen to view student assignments in calendar form.
2. Select the name of a student from the **Select Student** drop-down menu.
3. Select the school term with the assignments you want to print in the **Select Term** drop-down menu.
4. Click the **Print** button to open a small **Print Options** window.
5. Choose the start and end dates for the range of days to print.
6. Click the **Preview** button to open a window that offers you a preview of what the printed page will look like. It displays the range of dates you selected as well as all the schoolwork assigned on any of those days.
7. Click the **Print** button when you're ready to print the list of assignments.

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

### Printing an Assignment

1. On your **Home Page**, click **Lesson Book-Assignments**. Your **Lesson Book** will open.
2. Double-click the assignment title to go to that assignment. Alternately, you can choose to right-click the assignment, and select the **Print Assignment** option to display the window below.
3. Once you're in the correct assignment, click the **Print** button. A small pop-up window appears, allowing you to decide how you want the assignment to display—with presentations, problems, graphics, grades, student answers, or any combination of these. Before printing, you have the option to click the **Preview** button to view what your selections will look like on the printed page. Click **Print** when you're ready.

**NOTE:** If you don't see the assignment you're looking for:

- ~ Check to make sure the student's name (in the **Select Student** drop-down menu) is correct
- ~ Check to make sure the term (from the term drop-down menu) is correct
- ~ Click a subject name
- ~ Click a unit name
- ~ Double-click the assignment title in the **Student Schoolwork** section

**Print Options**

Show	Print	Range

### Editing a Student's Subject

SOS allows you to customize learning for your students and set options for your entire school, for individual students, or even for specific subjects that individual students are taking. The subject level is the most specific level where you can set options. It allows you not only to meet the learning needs of an individual student but also to address each student's needs within a specific subject.

You can edit a subject in SOS according to:

**Curriculum**—affects the units or assignments in a specific subject

**Assignment Settings**—affects how information is presented in a specific subject

**Quiz/Test Settings**—affects how quizzes and tests are presented in a specific subject

**Grade Settings**—affects how a student is graded in a specific subject

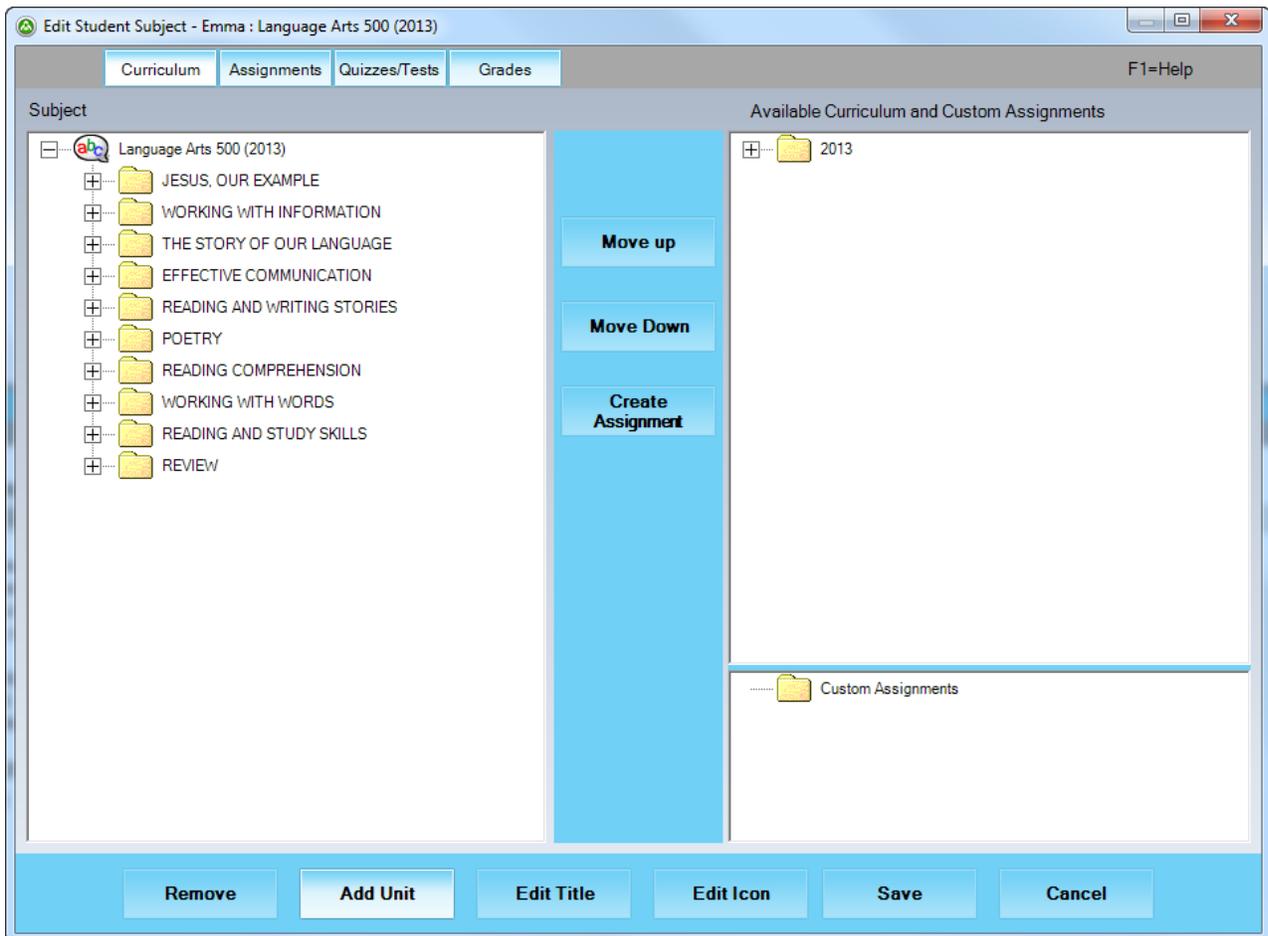

To edit a subject's subject settings for a student:

1. On your **Home Page**, click **Lesson Book-Assignments**. Your **Lesson Book** opens.
2. Use the **Select Student** drop-down menu to select the student whose subjects you want to edit.

## Switched-On Schoolhouse® 2013 Lesson Book Functions

3. Use the term drop-down menu (beneath the words “Student Schoolwork”) to select the term in which you assigned the student’s subject.
4. In the **Student Schoolwork** section, click to highlight any subject you want to edit. The **Edit** button in the lower left-hand corner is enabled, click it.
5. Click the **subject** name on the **Edit Student Subject** window that appears. This enables you to edit the subject.
6. Use any of the buttons and features on the **Student Subject Settings** screen to make changes to the subject.
7. When you’re finished editing your subject, make sure everything is saved and return to the previous screen. All of your changes are applied.

### Student Subject Tabs

Tells you which settings screen you are currently able to set different options for in the subject selected.

# Switched-On Schoolhouse® 2013

## Lesson Book Functions

### Editing a Subject – Curriculum Settings

#### Subject

This area displays the subject, units, and assignments selected. Any changes you make in this window affect the student's subject.

**NOTE:** Hide or display any curriculum subject by double-clicking its name.

#### Available Curriculum and Custom Assignments

This area holds the curriculum you can use to edit the student's subject. Hide or display any of it by clicking the + beside a folder or by double-clicking a subject or unit folder. When you're ready to edit the subject, drag assignments or units from here and drop them into the subject to the left.

All of the custom assignments you have created as a shared assignment are available to you to reuse in the **Custom Assignments** folder in the lower section of this column. Simply click the + beside that folder and drag the assignment you want to the unit folder, just as you do with any other assignment.

#### Remove

Removes a unit or assignment (and all the work and grades within it). To do this, highlight the item to remove in your **Subjects** window and click this button.

When you click **Save** after you remove an assignment or unit from a student with **Advanced Planning Enabled**, the **Select Due Dates** window appears. (See example on the next page.) You can change the **Start** and **End Dates** as necessary. You can also choose to change the days of the week when coursework in this subject is assigned to this student. If you decide to check a day that is not currently selected, make sure it is already designated as a regular school day. Click the checkbox beside the weekday to add or remove the checkmark. Only days with checkmarks will have coursework assigned to them.

Click **OK** when you are finished.

If you click **Cancel**, your changes are not saved.

Click the **Close** button to exit the **Edit Student Subject** window.

**NOTE:** You are prompted to change due dates for assignments because you are removing one or more assignments, which normally should change when subsequent assignments in the subject are due.

Select Due Dates

Since Advanced Lesson Planning is enabled for this student and you have made changes to the lesson plan for this subject, the system needs to reschedule due dates for all assignments in this subject. All of your customized due dates will be lost.

Please select the start and end date for this subject, or if you want to cancel saving, click Cancel.

Start Date: 12/05/2012

End Date: 07/16/2013

Schoolwork can be assigned by day of the week. You select the days of the week you want to assign schoolwork to your student in this subject.

Click the box next to each day to place or remove a checkmark. Schoolwork for this subject will be assigned only on days with checkmarks.

Assign by Day

- Monday
- Tuesday
- Wednesday
- Thursday
- Friday
- Saturday
- Sunday

OK Cancel

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Add Unit

Adds a new unit to the subject. Click this and then drag available curriculum into the new unit. You can also create a custom subject from this screen.

#### Edit Title

Changes the title of a subject or unit. Highlight the subject or unit and click this button. A cursor appears over the current name, so you can type in a new title.

**NOTE:** You can also edit an assignment title for any assignment after it has been assigned to a student.

1. Expand the unit containing the assignment by clicking the + sign.
2. Click **Edit Title**.
3. Make your changes and press **Enter**.
4. Click **Save** and close the **Edit Student Subject** window.

#### Edit Icon

Allows you to choose an icon to go with a particular subject. Select the subject name in the **Subject** window and click this button. A tiny window opens, displaying a number of small icons. The icon you click appears next to the subject name, helping you to easily recognize it and associate it with the subject.

#### Save

Saves any changes you make to the student's subject.

#### Cancel

Cancels any changes not yet saved.

#### Move Up and Move Down

Lets you decide the order a unit or assignment is presented to the student. Select the name of a unit or assignment in the **Subject** window. Click either of these buttons to move the unit/assignment up or down in the list.

1. Use any of the buttons and features on the **Curriculum** screen to make changes to your subject.
2. When you finish editing the subject, be sure everything is saved and return to the previous screen. All of your changes are applied.

#### Create Assignment

Opens the **Custom Assignment** form, after you select a unit. This allows you to create a project, lesson, quiz or test and include it in the selected unit. (See the Creating Custom Assignments in the Teacher Administration Functions Guide.)

### Editing a Subject - Assignment Settings

SOS allows you to customize learning for your students and set options for your entire school, for individual students, or even for specific subjects that individual students are taking. The subject level is the most specific level where you can set options. It allows you not only to meet the learning needs of an individual student but also to address each student's needs within a specific subject.

Suppose you set options that allow a student to have two chances to answer a problem correctly. You find that this student struggles with math and could work better without the pressure of being given only two attempts. At the subject level, you can set options in math so that this student has an unlimited number of attempts at a problem. This means that the student can get the extra help needed in math but still continue to be challenged differently in other subjects.

Just like at the school and student level, you can edit SOS subject level settings for:

**Assignment Settings**—affects how information is presented in a specific subject

**Quiz/Test Settings**—affects how quizzes and tests are presented in a specific subject

**Grade Settings**—affects how a student is graded in a specific subject

## Switched-On Schoolhouse® 2013 Lesson Book Functions

To edit a subject's assignment settings for a student:

1. On your **Home Page**, click **Lesson Book-Assignments**. Your **Lesson Book** opens.
2. Use the **Select Student** drop-down menu to select the student whose subjects you want to edit.
3. Use the term drop-down menu (beneath the words "Student Schoolwork") to select the term in which you assigned the student's subject.
4. In the **Student Schoolwork** section, click to highlight any subject you want to edit. The **Edit** button in the lower left-hand corner is enabled, click it.
5. Click the circle beside **Assignment Settings** in the **Student Subject Setup Sections** to open the **Assignment Settings**. This enables you to edit the subject but places a special emphasis on the options you can set for its assignments.
6. Use any of the buttons and features on the **Assignment Settings** screen to make changes to the subject.
7. When you're finished editing your subject, make sure everything is saved and return to the previous screen. All of your changes are applied.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Student Subject Setup Sections

Tells you which settings screen you are currently able to set different options for in the subject selected.

##### **Lesson options**

Allows you to decide how a student goes through lessons in the subject selected.

##### **Internet access**

Allows a student to be able to click www links in lessons. Removing the checkmark from this box blocks his/her access to the Internet through the curriculum.

##### **Leave skipped problem message**

Allows a student to skip problems in lessons after providing reasons to skip.

##### **Access answer key**

Allows a student to see correct answers to completed and graded problems.

##### **Easy spelling**

If **Easy spelling** is checked, all words less than 7 characters long are spell checked instead of marking the entire answer as incorrect if it includes a misspelled word. (All words 7 or more characters are automatically spell checked. If **Easy spelling** is checked, words less than 7 characters are also spell checked.)

##### **Spelling penalty**

Gives students partial credit for correct answers if there are misspelled words (as opposed to counting the entire answer incorrect if it includes a misspelled word). This is true for all words regardless of length. To require exact spelling in all student answers, set the **Spelling penalty** to 100%.

**NOTE:** Percentages you set here may not always apply. In some units, such as in Language Arts, the curriculum requires exact spelling and punctuation.

##### **Maximum problem attempts**

The maximum number of chances a student has to answer a problem correctly. After using all available attempts, the student receives a score based on the final answers.

##### **Unlimited problem attempts**

Enables a student to rework problems as many times as necessary until all of them are answered correctly

**NOTE:** If the student is stuck on a problem and cannot exit a lesson, you may need to permit the use of the **Help** button. (Student **Help** button)

##### **True/False problem attempts**

Controls the number of attempts a student has to answer a True/False question correctly.

##### **Problem attempts penalty**

Deducts a certain number of percentage points each time a student reattempts a problem. In the box, enter the number of percentage points you want deducted each time a student reworks an incorrect problem.

##### **Notification Threshold**

Allows you to receive a message if the student does not achieve the percentage score you set for this subject.

##### **Games Options**

Allows a student to play educational games in the curriculum. You have the ability to determine each individual student's access by game type.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Save

Saves any changes you make to the student's subject.

#### Use default

Returns all the options on the student's subject screens to student level settings, the settings most recommended for general use. Even if you change and save certain options on this screen, you can always come back to click this button and be returned to options you selected in **Student Setup**.

**NOTE:** This button resets not only the subject's **Assignment Settings** (displayed in the screenshot) but also the subject's **Quiz and Test Settings** and **Grade Settings** as well. This does NOT affect changes to the **Home Page Settings**.

#### Cancel

Cancels any changes not yet saved.

### Editing a Student's Subject - Quiz and Test Settings

SOS allows you to customize learning for your students and set options for your entire school, for individual students, or even for specific subjects that individual students are taking. The subject level is the most specific level where you can set options. It allows you not only to meet the learning needs of an individual student but also to address each student's needs within a specific subject. If you have a student who excels in Science, you may want to challenge them by changing their Quiz and Test options to **No answer feedback**, so they only have one attempt.

To edit a subject's Quiz/Test settings for a student:

1. On your **Home Page**, click **Lesson Book-Assignments**. Your **Lesson Book** opens.
2. Use the **Select Student** drop-down menu to select the student whose subjects you want to edit.
3. Use the term drop-down menu (beneath the words "Student Schoolwork") to select the term in which you assigned the student's subject.
4. In the **Student Schoolwork** section, click to highlight any subject you want to edit. The **Edit** button in the lower left-hand corner is enabled, click it.
5. Click the circle beside **Quiz/ Test Settings** in the **Student Subject Setup Sections**. This enables you to edit the subject but places a special emphasis on the options you can set for its quizzes and tests.
6. Use any of the buttons and features on the **Quiz and Test Settings** screen to make changes to the subject.
7. When you're finished editing your subject, make sure everything is saved and return to the previous screen. All your changes are applied.

### Student Subject Setup Sections

Tells you which settings screen you are currently able to set different options for in the subject selected.

#### Quiz Options

Allows you to decide how a student goes through quizzes in the subject selected.

#### Test Options

Allows you to decide how a student goes through tests in the subject selected.

#### Immediate answer feedback

Allows a student to view scores on problems during quizzes and tests. The student has only one attempt at answering.

#### No answer feedback

Does not allow a student to see scores to problems until an entire quiz or test is completed. The student then receives a score of zero for any still-unanswered problems. The student answers one question at a time and has only one attempt at answering.

#### Open page

Lets the student review and modify answers to problems multiple times, until the quiz or test is officially exited.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

**NOTE:** This is the SOS default. Unless you change the option, all quizzes and tests are presented to this student in this subject in **Open Page** format.

#### **Open book**

Allows a student to exit and re-enter a quiz or test as many times as he/she wants until deciding to officially exit.

#### **Leave skipped problem message**

Allows a student to skip problems in lessons after providing reasons to skip.

#### **Access answer key**

Allows a student to see correct answers to completed and graded problems.

#### **Easy spelling**

If **Easy spelling** is checked, all words less than 7 characters long are spell checked instead of marking the entire answer as incorrect if it includes a misspelled word. (All words 7 or more characters are automatically spell checked. If **Easy spelling** is checked, words less than 7 characters are also spell checked.)

#### **Spelling penalty**

Gives students partial credit for correct answers if there are misspelled words (as opposed to counting the entire answer incorrect if it includes a misspelled word). This is true for all words regardless of length. To require exact spelling in all student answers, set the **Spelling penalty** to 100%.

**NOTE:** Percentages you set here may not always apply. In some units, such as in Language Arts, the curriculum requires exact spelling and punctuation.

#### **Save**

Saves any changes you make to the student's subject.

#### **Use default**

Returns all the options on the student's subject screens to student level settings, the settings most recommended for general use. Even if you change and save certain options on this screen, you can always come back to click this button and be returned to options you selected in **Student Setup**.

**NOTE:** This button resets not only the subject's **Quiz and Test Settings** (displayed in the screenshot) but also the subject's **Assignment Settings** and **Grade Settings** as well. This does NOT affect changes to the **Home Page Settings**.

#### **Cancel**

Cancels any changes not yet saved.

## Editing a Subject - Grade Settings

SOS allows you to customize learning for your students and set options for your entire school, for individual students, or even for specific subjects that individual students are taking. The subject level is the most specific level where you can set options. It allows you not only to meet the learning needs of an individual student but also to address each student's needs within a specific subject.

To edit a subject's grade settings for a student:

1. On your **Home Page**, click **Lesson Book-Assignments**. Your **Lesson Book** opens.
2. Use the **Select Student** drop-down menu to select the student whose subjects you want to edit.
3. Use the term drop-down menu (beneath the words "Student Schoolwork") to select the term in which you assigned the student's subject.

### Lesson Book Functions

4. In the **Student Schoolwork** section, click to highlight any subject you want to edit. The **Edit** button in the lower left-hand corner is enabled, so you can click it.
5. Click the circle beside **Grade Settings** in the **Student Setup Subject Sections**. This enables you to edit the subject but places a special emphasis on the options you can set for its grading.
6. Use any of the buttons and features on the **Grade Settings** screen to make changes to your subject.
7. When you're finished editing your subject, make sure everything is saved and return to the previous screen. All your changes are applied.

### Student Subject Setup Sections

Tells you which settings screen you are currently able to set different options for in the subject selected.

#### Grading scale

Lets you customize how you want the subject's scores to be calculated. Enter a percentage for each letter grade.

#### Assignment weighting

Allows you to decide how different assignment types affect a student's subject grade. The percentage you give to lessons, projects, quizzes, and tests in this subject should add up to 100%.

## Switched-On Schoolhouse® 2013

### Lesson Book Functions

#### Grade display options

Lets you decide how you want a student's subject grade to be displayed on the screen and printed in reports.

#### Save

Saves any changes you make to the student's subject.

#### Use default

Returns all the options on the student's subject screens to SOS's student default settings. Even if you change and save certain options on this screen, you can always come back to click this button and be returned to options you selected in **Student Setup**.

**NOTE:** This button resets not only the subject's **Grade Settings** (displayed in the screenshot) but also the subject's **Assignment Settings** and **Quiz/Test Settings** as well. This does NOT affect changes to the **Home Page Settings**.

#### Cancel

Cancels any changes not yet saved.

**Remember:** To edit assignment, quiz and test, grade or term settings at the school or student level, use the **administrative functions** in the **Administration** widget from your **Home Page**. You can find instructions either in the electronic **Help** file or the Teacher Administration Functions User Guide.
